

## **COORDINATING COLORS FOR YOUR PROJECTS!**

***“That color looked Awesome in the Parade home we walked through, why doesn’t it look right in our home???”***

***Whether we are remodeling our home or building from scratch, it’s safe to say that we put a lot of TIME, EFFORT and MONEY into the selections that we ultimately make. Both interior and exterior projects benefit hugely from some specific considerations being taken into account before actual purchasing decisions have to be made.***

***The #1 rule when it comes to planning and coordinating projects is to start early, so that there is time to go through the basic steps before “D-Day” arrives and decisions have to be made in haste! Many times, the color selections weren’t necessarily wrong, but the TONE of the color(s) were not correct or complimentary to adjacent surfaces that also contain “color”.***

***As the need to make decisions approaches, gathering up the various samples of all of the components to be used and consulting with The Paint Factory, you can find a comfort level and feel confident in your color decisions! When you gather up and bring in your “pile” of samples, we can help you make decisions that you’ll be happy with. We don’t pick your colors for you, only you know what you like. What we can do is analyze the compatibility of the various TONES and how they do or don’t flow together. The ultimate goal is a sense of complimentary color throughout the project! Other than color, Natural and Artificial Light Sources can change the way a color looks.***

***Examples of building materials to bring together for consideration....***

### ***Interior Projects:***

***Carpet / Rugs                      Existing or New Fabrics  
Tile & Wood Flooring        Stonework/Brick  
Counter Tops                    Window Treatments  
Wood Cabinetry                Wall Hangings/Pictures  
Wood Trim & Doors          Any Item Containing Color***

### ***Exterior Projects:***

***All Siding Materials used (Wood, Metal, Stucco...)  
Window Color (Vinyl, Metal Clad...)  
Stonework/Brick  
Roofing Shingles  
Anything on the Property Containing Color***

***\*\*\*Decisions regarding stained or clear-finished wood require samples on your wood\*\*\****
